EDUCATION

University of California, Davis
Bachelor of Science in Computer Science

Davis, CA
Sep. 2021 – Jul. 2025

EXPERIENCE

Software Engineer (Product & Platform Operations)

Aug. 2025 – Present

JLK - US R & D Department

Santa Clara, CA

- Collaborated with engineers to QA/QC medical AI solutions and documentations for hospital deployments
- Monitored AWS logs, reported system issues, and coordinated fixes with developers to maintain product reliability
- Built an internal task management platform to organize team work items and improve workflow visibility
- Conducted market and competitor research using public datasets to support product and pricing strategies
- Developed Python automation to optimize build pipelines for PACS-AI gateway software

Founding Engineer

Apr. 2024 – Present

Stealth Startup (Travel Experience Platform)

- Co-founded and built a travel experience platform, leading full stack development and product architecture
- Worked with the co-founder to define product roadmap, features, revenue models, and go-to-market strategy
- Conducted competitor analysis and built frameworks including TAM/SAM/SOM, Golden Circle, 5 Whys, etc.
- Managed development using GitHub Kanban, reviewed PRs, and onboarded new team members
- Engaged early users through Discord community and incorporated feedback into product features
- Top 10 Finalist in the Summer 2024 Upstage AI Hackathon (3-month startup hackathon)

Project Manager Intern

Mar. 2025 – May. 2025

LIKELION US

- Managed projects using Jira and Slack, coordinating tasks and deadlines across engineering, marketing, and leadership teams
- Organized sprint planning, stand-ups, and stakeholder meetings to track progress and align project goals
- Conducted competitor analysis of product UI/UX and performed front-end QA testing before release

Software Engineer Intern

Jun. 2024 – Sep. 2024

SelfActualize.AI (Now WingRep)

San Francisco, CA

- Developed front-end features for an AI coaching platform using HTML, CSS, JavaScript, and TypeScript
- Built backend APIs and Lambda functions supporting ML-driven features using Python and JavaScript
- Managed tickets and feature development using Trello, GitHub Kanban boards, and Slack
- Improved GPT-4o outputs through prompt engineering and debugging

Tech Lead

Jan. 2023 – Feb. 2024

Google Developer Students Club

Davis, CA

- Led development of an AI/ML recycling app using Flutter and TensorFlow to classify waste materials
- Proposed improved recycling sorting systems addressing U.S. recycling inefficiencies
- Built an AI palette-generation platform using Flutter, Flask, and scikit-learn
- Projects received the 2023 Winter Most Creative Project Award and Spring Best Beginner Project II Award

President / Full-Stack Developer / Project Manager

Sep. 2023 – Jun. 2025

LIKELION US @ UCD

Davis, CA

- Led a student tech organization focused on product development and entrepreneurship
- Led a 4-person team to design and develop a sign language translation app, defining the product concept and coordinating development to deliver an impactful prototype
- Won 1st place at the 2023 LIKELION US Ideathon with the sign language app prototype

TECHNICAL & PRODUCT SKILLS

Product Tools: Agile, Jira, Trello, GitHub Kanban, Slack, Figma, Roadmapping, Backlog Prioritization

Languages: Python, Java, C++, JavaScript, TypeScript, Dart, Kotlin, R, MATLAB, HTML, CSS

Developer Tools: AWS, GitHub, Linux, React, Flutter, Flask, MongoDB, Supabase

Libraries: NumPy, pandas, PyTorch, scikit-learn, TensorFlow, Matplotlib, ggplot2, seaborn

Languages Spoken: English, Korean, Spanish (Intermediate)
